

Boundary Type	Crust Involved (Oceanic-Oceanic, Continental-Continental or Oceanic-Continental)	Formations (What does this boundary create? Ex: mountains)	Diagram (Draw and label the plate boundaries)
	Oceanic-Oceanic ↔ (moving apart)		
	Continental-Continental ↔ (moving apart)		
	Continental-Oceanic →← (moving together)		
	Oceanic- Oceanic →← (moving together)		
	Continental-Continental →← (moving together)		
	Crust type doesn't matter → ← Plates are sliding and scrape along one another
