

## Unit #1 Study Homework

**Assignment 1: Due Wednesday**- Use the vocabulary list below and create flash cards of 10-15 words and definitions. Please see the homework tab at [Msfcastellano.weebly.com](http://Msfcastellano.weebly.com) for information about how to make flash cards.

**How do I choose the right words?** Choose at least 1 word from each topic. Choose words that you aren't sure of.

Historical Theories	Our place in Space	Planetary Motion	Planets	Comets, Asteroids, Meteoroids
Geocentric Heliocentric Big Bang Theory Universe Singularity Model	Spiral Galaxy Elliptical Galaxy Irregular Galaxy Orion's Arm Milky Way Galaxy Light year Virgo Super cluster Local Group	Inertia Gravity Orbit	Inner Planets Outer Planets Terrestrial Planets Gas Giants	Comets Asteroids Meteoroids Meteors Meteorites Elliptical Orbit Atmosphere Oort Cloud Asteroid Belt Kuiper Belt

**Assignment 2: Due Thursday**-Complete a Quizizz on a topic of your choosing. Please write your first name and last initial in the name section so I know you completed the assignment (Ex: Faith C) Find the quizziz linked to the blogs homepage or the homework tab.

Planetary Motion: 332087

Historical Models: 520427

Comets, Asteroids, Meteoroids: 367691

**Assignment 3: Due Friday**-Student choice. What does your learning style tell you? Read your notes aloud? Re-write your notes? Practice your flashcards? Play quizlet or quizzizz?

Whatever you choose, do it for at least 15 minutes and write down 3 things you want to remember for tomorrow's test in the box below.
